

Pre-seminar and SWOPS Transnational meeting in Motala, Sweden. Agenda frames

Pre-seminar: There has been a great interest among our Swedish network partners (companies, municipality functions, university, and organisations) to learn more about the core expert knowledge of our partner organisations themselves.

That is why we came up with the idea to invite to a pre-seminar, where we hope to share experiences and learn from each other. The topics that we have suggested are

- Competence Development in SME (and perhaps quality assurance) (Germany)
- Employers' Association for shared resources (France)
- Eco companies and environment issues (Austria – who we look forward to meet)

We hope to come back to you for a dialogue about the issues that you would like to present, and what kind of contacts you would like to have with representatives from our Swedish network associates – all of this to arrange a platform for experience exchange and mutual benefit.
